

## CHARGES TRICKERY BY POSTMASTERS

Illinois Democrat Tells President Wilson of Evils in Small Offices.

Sensational charges of incompetency and political trickery against Republican third and fourth class postmasters of Illinois were presented today to President Wilson by a delegation of Illinois Democrats including five of the Illinois Congressmen and State Senator Kent E. Keller.

State Senator Keller, who acted as spokesman for the delegation, frankly admitted that the purpose in bringing these charges to the attention of the President was to bring about the dismissal of these men and the appointment of Democrats in their stead. He declared that unless this is done the Democrats will not have a chance to capture the Congressional election in the fall of 1914.

In the party with Mr. Keller were Congressmen Foster, Baile, Fowler, Graham, and Hill. Senator James Hamilton Lewis was to have gone before the President with the delegation, but he saw the President later.

Charges Mail Delay.

Among the charges preferred by the delegation, State Senator Keller declared that during the last election when he was a candidate for the State senate, he mailed eleven days before the election a large number of pictures of himself to constituents in his district. He charged that the delivery of these pictures was held up by the postmasters until several days after the election.

Speaking in the corridor before seeing the President, Mr. Keller said:

"The President may not wish to break up the civil service system, and we do not wish him to do it. Nevertheless, it is a notorious fact in Illinois that the civil service examinations held there for postoffice jobs, and particularly for third and fourth class postmasters, are a farce. The Republicans have long realized the tremendous power which they enjoy from having Republicans in these positions, especially around election time, when political parties are making campaign literature. Consequently the examinations are a farce, and Republicans have always won out. Conditions in the postoffice are a disgrace, and yet Republican inspectors have blandly stated after each investigation that things are lovely."

Asks for Investigation.

"What we want President Wilson to do, and what we believe he will do when once he is in possession of the facts, is to appoint at least twenty Democratic inspectors to learn the truth. When that is learned, these Republican postmasters can be turned out, and Democrats given an equal chance to hold the jobs."

"In many of the Congressional districts the lines are very closely drawn between the Democrats and the Republicans. The appointment of a Republican third or fourth class postmaster in a single district might change the entire situation. Recently a Republican was appointed in Congressman Hill's district and it has cost us 150 voters in one precinct. Something has simply got to be done. We only ask what is fair, and we believe that while the President intends to uphold the civil service, he is a good enough politician to appreciate our difficulties."

"I have been tried to stir up our fellows in Congress to call on the President before this and lay the matter before him, but they have been a little timid, and have not wished to bother him. I came here believing that the President is one to whom anybody can talk freely and as man to man."

Some Incompetent.

"Referring to some of these examinations that have been held for these postmasterhips, I may say that I once taught school in my district, and I have a pretty good line on the abilities of the younger men there. I know that one of the men now on the force of the postmaster at Murphysboro, Jackson county, can barely read and write, while others who took the examination, but were Democrats and did not land, are among the most intelligent and quick-minded fellows in the community."

"The whole system here in Illinois is rotten, and once it is aired through investigations by other than Republican inspectors, there is not much chance of many of the incumbents remaining."

Mr. Keller managed the campaign of Senator James Hamilton Lewis in Illinois, and is regarded as one of the powerful political leaders of the State.

## Legislative News

Roads Can Make Special Rates.

The Interstate Commerce Commission has not the power to fix rates for railroad Sunday school excursions, according to a decision handed down today. Commissioner McChord vigorously dissenting. The majority verdict is so long as there is no discrimination the roads can grant one day, non-baggage trips and make special rates. The complainant in the case, the Carnegie P. A. Board of Trade, sought to have an old excursion rate restored.

Discrimination Alleged.

Complaint was made by nineteen West Virginia coal mining companies to the Interstate Commerce Commission today with respect to coal car distribution by the Baltimore and Ohio during the fall months when demand is heaviest. Discrimination in favor of other companies is alleged. The complaining companies are located on the Monongah division.

Decker Slated for Job.

Congressman Decker, Missouri Democrat serving his first term in Congress, is slated for a vacant seat on the House Interstate Commerce Committee. His candidacy was considered today by the Ways and Means Committee for presentation to the Democratic caucus Thursday.

Plan \$15,000 Saving.

A saving of \$15,000 annually to Uncle Sam by ceasing publication by the Department of Agriculture each year of a bulky document of 1,000 pages showing detailed department expenditures was planned today by the House Committee regulating the department's official purse.

Say Wig Caused Death.

MIFFLIN, Pa., July 30.—The death of A. B. Swearer, a Pennsylvania railroad track laborer, is attributed to his wearing a wig while working in the boiling sun, causing veins in his head to burst.

## BIXBY TO RETIRE IN ANOTHER'S INTEREST

Engineer Corps General Asks to Be Shelled So Brother Officer Can Be Promoted.

In order that his brother officer might not be compelled to retire before he had reached the highest rank in his branch of the service, Gen. William H. Bixby, chief of engineers of the United States army, will retire August 31 at his own request. Col. William T. Russell senior colonel of the Engineer Corps, is the brother officer in whose interest General Bixby is relinquishing his duties.

Ordinarily, General Bixby would not have to leave the service under the age limit until next December. Colonel Russell, because of the age limit would have to retire next October. Therefore, in order that Russell might reach the highest grade before retirement, General Bixby has asked to be relieved early next month.

One of the best known and quoted authorities in the country on bridge construction, General Bixby, in the face of strenuous opposition from engineering circles, demonstrated the practicability of constructing a 3,000-foot span across the Hudson river. His name has been associated with the big work of the army engineers, including the improvement of the Mississippi river. He is a native of Charlestown, Mass., and a graduate of West Point.

Colonel Russell was born in Alabama, and was graduated from West Point in 1873. At present he is engineer of the Eastern division with headquarters in New York.

Earthquake at Tacoma.

TACOMA, Wash., July 30.—Two sharp earthquake shocks, covering an area of more than 100 square miles, took place here, and created general alarm. The disturbances, lasting about a half-minute each, were most strongly felt at Ashford and La Grande.

BON AIR, the New Idea in Suburban Development

To the Public:

I want to say a word to you personally about this NEW IDEA. I feel that you ought to hear of an unusual opportunity existing TODAY in Washington real estate, to secure for yourself a home under ideal conditions, or to make a safe investment for your savings.

I am not asking you to invest your money in a gold mine in California, or in an orange grove in Florida, but in a garden spot in the shadow of the White House; readily accessible for inspection; courting investigation. The men associated with me in this enterprise (you know them), and backing me financially, are available at all times. They are men of irreproachable character, not strangers in the land, here today, gone as soon as they have turned their money over, but men who were born and reared in this section, and their fathers before them; public servants, all of them; men with all the traditional pride of Virginians in Virginia soil; and not only their money but their hearts are in this development. Civic pride as well as personal aggrandizement compel them to give you the greatest possible value for your money.

This new suburb is not growing up on a mere street car line, but on a trunk line, one of the units of a great trans-continental railway system, the highway of the great South and Southwest to the Nation's Capital. It is within five miles of Pennsylvania avenue, in that part of Alexandria County that was once a part of the District of Columbia; where the taxable basis has increased over 300% in the last five years; the population over 250%; where public service corporations have doubled and trebled their facilities many times, in order to take care of the great increase in business, and the constantly growing demands of a rapidly growing community.

In laying our plans for this new suburb we early determined that it should be first a community of homes, and second that it should be available to the man of moderate

## WELTHY ATTORNEY TAKES THIRD BRIDE

C. A. Snow, Widely Known as Philanthropist and Work for Humane Society.

C. A. Snow, millionaire patent attorney, philanthropist, and officer of the Washington Humane Society, who gained fame throughout the country a few years ago by starting a movement to require organ grinders to supply their accompanying monkeys with shoes and gloves to protect them from the hot asphalt in summer, was married yesterday to Miss Addis M. Hubbard, who, for the last year, has lived in apartments at the Farragut.

The bare announcement of the wedding was made from the offices of Mr. Snow today. No one connected with the office would give information regarding the plans of Mr. and Mrs. Snow.

It is the millionaire's third venture on the matrimonial sea. A divorce separated Mr. Snow from the first Mrs. Snow today. The second died in this city three years ago. The wedding yesterday was a great surprise. That Mr. Snow and his bride were even good friends was known to but few of the associates of either.

Mr. Snow is sixty years old, and his bride is thirty-five. The ceremony was performed in the apartments of the bride at the Farragut Hotel. Rev. George A. Miller, pastor of the Ninth Street Christian Church. There were but two witnesses immediately Mr. and Mrs. Snow left Washington for New York where they will remain a day or two. They then will leave for Canada, and will honeymoon there till October 1, when they will return to Washington.

They will be at home at Fenwick Farm, Silver Spring, Md., after October 1. Mr. Snow is one of the best known men in Washington, having amassed a fortune as a patent attorney, and is best known as a philanthropist, having given thousands of dollars annually for charitable purposes. For eight years he was president of the Humane Society, and in his endeavors to protect the animals of Washington, originated the shoe and glove idea for monkeys. Mrs. Snow is a sister of Miss Anna Hubbard, employed in the Department of Agriculture.

Failed to Read Writ; Judge Fines Woman

Two fines of \$5 each were assessed against Mrs. Minnie Jones, of the Clermont apartments, and her son, Everett Jones, on a charge of contempt of court, by Judge Lattimer, of the Juvenile Court, yesterday, the specific charge being that they failed to appear in court Monday after a writ had been served on them.

The original charge against Everett Jones alleged that he had broken a chair and had been otherwise disorderly in the apartment building, as charged by Judge Lattimer. He and his mother were cited to appear Monday, but Mrs. Jones said she did not read the paper which was served on her, and consequently did not answer.

She was notified that unless she and her son were on hand yesterday they would be arrested. After a severe criticism Judge Lattimer allowed her to go under bonds of \$100, when she promised to pay the fines before next Monday.

## ADDITIONAL STORY TO HOUSE BUILDING

Fifty-one Offices to Be Added for Use of Congressmen Now Crowded Out.

After many conferences with Speaker Clark, Leaders Underwood and Mann and other prominent Congressmen, Superintendent of the Capitol Elliott Woods has about completed plans for the new story that is to be added to the House Office Building.

The additional story will contain fifty-one rooms, but changes in the construction on the lower floors will give twelve additional offices, bringing the total number of offices made available by the remodeling to sixty-three.

In order to preserve the architectural effect of the building as it is, the added rooms will be built only on the court side of the building and will not be visible from the street. A continuous balcony will be placed around the inside of the new floor, overlooking the court.

Except for the stone work, etc., no contracts will be let, but Superintendent Woods himself will act as general contractor and will give close personal supervision to the work. The plans are now being finished by G. Pierson, an architect formerly in the office of the superintendent. The appropriation of \$230,000, which may be exceeded, was made March 4.

The completion of the new addition will be immediately followed by the destruction of the Malby building. Many of the new Congressmen, for whom the new addition is being made, are now housed in this historic structure, and as soon as their new quarters are provided, the older building will be of no further service to the Government. It stands on the land that is to be taken into the enlarged Capitol grounds. Many of the most distinguished statesmen of the bill have offices in this building, which has long been used as an annex to the Capitol, but is now sadly antiquated.

ITCHING SKIN IS SOOTHED BY POSLAM

What relief there is in an application of Poslam, the perfect skin remedy, when the feet are itching, tired, chafed or blistered or the skin is irritated or broken out on any part of the body.

Itching stops at once; the trouble is soon controlled and eradicated. With that he pulled off one of the shoes and was about to take off the other when the young man placed the Holy Cross Cemetery. Toney fell into the open grave. Four deaths were reported as due to the heat today.

POSAM SOAP is the soap of soaps for daily use. It is the best means of improving color and texture of the skin and assuring its continued health. Absolutely pure, it removes its rare beneficial effects from medication with Poslam. Soothes tender skin. Best for infants.

All drugists sell Poslam (price 50 cents) and Poslam Soap (price, 25 cents). For free samples, write to the Emergency Laboratories, 32 West 35th Street, New York City.—Adv.

## Small Girls Advised As to Their Diet and Clothing in Summer

Don't eat candy more than once a week.

Don't eat cake more than once a week.

Don't drink tea or coffee more than once weekly.

Don't beg pennies for candy of your mother oftener than once a week; make the responsibility yours.

Bathe once every day; at least in the summer time.

Take one or two hot baths as well as cold showers each week.

Wear loose simple clothing and don't tease your parents for frilly frocks.

Avoid corsets.

Pulls Off Wife's Shoe As She Walks With Man

SACO, Me., July 30.—Irving L. Meserve, an expressman, who attempted to take a new pair of tan shoes from the feet of his young wife when he met her walking in Main street with a young man he did not know, was released from custody after a lecture by Deputy Marshal William B. Grant.

According to Special Officer Whitworth, when Meserve saw his wife he rushed across the street, and, seizing one foot, exclaimed: "You're not going to parade in my shoes. If that man is going to walk with you, he can buy your shoes."

That he pulled off one of the shoes and was about to take off the other when the young man placed the Holy Cross Cemetery. Toney fell into the open grave. Four deaths were reported as due to the heat today.

PHILADELPHIA, July 30.—Lightning killed Patrick Toney, fifty years old, while he was digging a grave in Holy Cross Cemetery. Toney fell into the open grave. Four deaths were reported as due to the heat today.
